

OGC SensorThings API Platform

SensorUp is the world's first and most advanced OGC SensorThings API cloud server.

Build your Internet of Things applications effortlessly

Connecting IoT devices, managing real-time sensor data and creating an IoT application can be a highly complex and expensive undertaking. SensorUp makes the creation of ISO/OGC-compliant IoT applications fast and easy.

SensorUp is the open standard solution for the fragmented world of IoT, providing unmatched simplicity, flexibility and scalability to any forward-thinking organization that would like to transform their business in the IoT revolution.

OGC/ISO STANDARD
